EGYPT EXPLORATION FUND

EGYPT EXPLORATION FUND
The proceedings at the recent freeding of
the Egypt Exploration Fund, of which a
detailed account appeared in our columns, add
a fascinating chapter to the story of archinological research. They show, anys the "Morn
ing Post," that the spirit. which led Schliemans to realise his desire to by have the site of
ancient. Troy is still no less active among
scholars of the present. But if Schliemann may
be said to have led the way in the modern
exploration of ancient sites his successore have
derived enormous assistance from the stores of

scientific knowledge which have been accumulated since his day. The close investigation of the Ægean area has prevaled civilisations extending into unplambed antiquity. In particular the marvellous discoveries of Mr. Arthur Evans at Onosoo, in Crete, have necessitated a "construction" of theory which is still the subject of much controlve-sial discussion. In Egypt the same admirable work is being carried on with results which are obvious even to the casual visitor of the great mational measums in Europe and America. The part played by the Egypt Exporation Fund is well known to scholars and laymon alike. Among the first of its successes was the discovery in 1883, by M. Naville, of Pithous Succest, one of the "store cities built by the forced labour of the Hobrew daring the oppression. Two years late the investigations of Professor Flinders Petrit at Naukratis threw a food of light upon Greek arts, trade, manufactures, and writing the control of the store of Chryynchas have brought to light a quantity of Greek papyri of incalculable value to statent of ancient Hierature, sacred as well as proface. Among the texts which have already been published, the Legis or assistee of Jaco dents of ancient literature, accred as well as profane. Among the texts which have already been published, the Logia or sayings of Jesu are perhaps the most famous. At the last meeting Dr. Grenfell was able to announce a fur r batch of discoveries on the same site. Th find which must naturally have most intere ind which must naturally have most inferest for the general reader is concerned with a new Gospel fragment, written on a leaf out of visilum book, which was found in one of the international control of the control of the control of the format of the form

## KHEDIVIAL SPORTING CLUB. FIRST SKYE MEETING.

There are various changes to be noticed in and about the grandstand of the Chrisch race course this scare in New iron railings have takes the place of the old wooden paling, and the law has been curtailed somewhat in order to give extra width to the course. Flowers and stretle, while surely are an incovation, row bloom in front of the stewards stand, and in various ways the vigorous hand of the new scentary to the club has made ittelf felt. Luckily the cold snap of the last few days was followed by quite a balany Friday, so that there wan quite a goodly show of pretty frocks to be seen upon the lawn during the first meeting of the season, and if fore were worn by any they were surely denned rather as consense than necessities. General Bullock, with Mr. and Miss Bellock, were early in their places in the front of the stand; and there was quite a good standance by the time the second race was won. Mr. Bellock was searing violet clott, while Miss Bellock was in white, with a long pale blue fasther in her hat, which was almost hidden beneath a floating will of violet. Near them were string Col. and Mr. o thorne, the latter wearing doll green with toque and small box of grebs. Near them, too, were the latter wearing doll green with toque and amall box of grobe. Near them, too, were Mejor Robertson Eustace and his bride.

The strength of No. 2 Company Royal serison Artillery, which has its quarters in an Citadel, Cairo, with a detachment at thartoom, has been fixed at five officers and 70 ncn commissioned officers and gonders.

Adm is to be discontinued as a station for a British industry battalion. Tommy Atkins of the line will not be sorry to bear this as be it wont to say that there is only a sheet of very thin paper between it and—the orber place. But the fators, the garrino will consist of British R. G. A. and Indian Infantry. At one time, Adom was practically a penal statior, where misebasing battalious purged themselves of their inquisites, and doubtless laid up a good credit balance to draw upon.

In reply to those who are constantly enquiring as to the future prospects of the leading 'and companied doing bosiness in Egypt, the following extract from the 'Westminster Gastre' will be read with interest in Egypt, the following extract from the 'Westminster Gastre' will be read with interest extractive the property grows more and more apparent every day. In Cain, and also in the other principal town, land, property, and manifestores continue to rice in value, and this state of things has lasted now for over three years, presenting an almost angaralleled case of the growth of antical property;. Not only dose the value of building site increase, but it second to do so on uniform scale. In the more contral parts of the town it may be given as 1, 14, 2, 23, 3, 3c; for the outlying district the rise is about halved. It is difficult to gauge the extent of this increase, for, as prices 1g0 up, reats increase and demand outlines to keep glose in the Egyptian Metropolit, and to lat there has been no sign of plethors. The populace seems to grow in property as it forcease in moment, just as it might do in a big American town. "The sandgery is striking, As in Illinois and Louisians so in Egypt an encommonally rich country law is all like for centrairs; but here while the land rests i, the people were increasing, and as soon as a Reponder' i real supplanted the destrective indicesces of the past, as soon as according was asseed by the compation, the destrective indicesces of the past, as soon as according was asseed by the compation, the
